## SUMMARY OF QUALIFICATIONS

I offer 7 years of experience in the web design/development field. Currently deep diving into Object Oriented Programming with PHP and Laravel.

## WORK EXPERIENCE

**Web Designer** | [Solcre Technology Solutions](#) | **Montevideo, Uruguay** | **From Mar 2013 to Nov 2014**

Validation of HTML and CSS Code to find errors. Use of templates to create website according to customer needs. Use the CMS developed by the company called Columnis. Basic programming with Javascript and jQuery. Debugging javascript.

**Web Designer** | [Tavano Team](#) | **Montevideo, Uruguay** | **From Apr 2015 to Jan 2019**

Implement a new Theme (template) within NetSuite, that would be used to redesign the entire website, while the current one remains published without suffering any unwanted changes.

Modify all the styles of the site, based on the aesthetic guidelines defined by the client. Investigate functionalities and integrate them into NetSuite so that they work correctly alongside existing functionalities and NetSuite's default code.

Create and / or modify as the case may be, design elements (modify logo, banners, sliders, images, sections) following the same aesthetic guidelines already present in the corporate image of the company, and update them while the client site is live.

Code simple Frontend scripts so that the visual structure is maintained regardless of what content is populated on NetSuite's backend.

**Web Designer** | [SuiteDB](#) | **Montevideo, Uruguay** | **From Feb 2020 to Oct 2020**

SuiteDB is a company that also works with Netsuite, my responsibilities were very similar to the ones I had in Tavano Team.

## EDUCATION

**Technical School of Communication & Graphic Design (UTU)** | **Montevideo, Uruguay** | **From Mar 2013 to Nov 2014**

Area of Study/Major: Graphic Design

Great course in which I learnt how to think about design as a communication tool beyond the aesthetic aspect, and the importance of achieving a balance between both.
